

# Volunteers Needed for Research Study in Patients with NTM Lung Infection

## Have you been diagnosed with NTM Lung Infection?

### Am I eligible to participate?

If you have been diagnosed with refractory NTM lung infection and are aged 18 years or over you could be eligible to participate.

### What are the potential benefits?

Participating in this study will give you access to an innovative therapeutic solution which safety and efficacy is still under evaluation. You may or may not benefit from this new treatment but your participation will provide important medical information to help develop new treatments for NTM patients.

### What does this research involve?

You will need to attend a screening visit at a study hospital, stay in the hospital for 5 days, and attend follow up visits for a total of approximately 6 months involvement.
